circuit

receiver

#### Three Tips

#### **ADDITIONAL FEATURES**

##### **DSP 100% Digital Signal Processing**

##### **AFC Adaptive Feedback Cancellation**

Automatically reduces feedback (whistling) without lowering amplification  
Up to 17 dB of added stable gain  
Improves telephone use

##### **4 Channel WDRC - Wide Dynamic Range Compression**

Softer sounds are amplified more than louder sounds  
Detects and instantly reduces loud sounds, returns to normal listening very fast

##### **Custom Fit**

Left Ear and Right Ear designed ITC shells  
Three tip sizes to comfortably fit a wide range of ear canal dimensions  
Tips help prevent earwax from blocking the receiver port  
Tips are manufactured from a pliable, silicone elastomer evaluated to be biologically & toxicologically safe

##### **Self Maintained**

- Designed for the Right Ear - red shell
- Designed for the Left Ear - blue shell
- Volume control - on/off indicator
- Conveniently insert & remove as desired
- Suitable for a range of mild to moderately severe hearing loss
- Replaceable size 10A batteries

##### **Technical Data Nexear™ Hearing Aids**

Nexear™ hearing aids meet or exceed standards for Specifications of Hearing Aid Characteristics set by the American National Standards Institute (ANSI). Test findings have confirmed that the circuitries in Nexear™ hearing aids are designed to accommodate individuals with mild to moderately severe hearing loss, amplifying sound effectively within the critical speech range.

##### **Warranty/Trial Period**

All Nexear™ hearing aids are warranted against defects in material and workmanship. An unconditional trial period is provided. See owner's manual.
